**Milliken & Company Debuts YES Essentials® Innovative Fabric
at NeoCon**

Spartanburg, S.C. (May 30, 2008) - Milliken & Company, one of the largest privately held textile and chemical manufacturers in the world, brings a new line of innovative fabrics to NeoCon World's Trade Fair 2008.

YES Essentials is a high-performance line of fabrics featuring technology that resists moisture, stains, and odor-causing bacteria and will be introduced in conjunction with Herman Miller Healthcare. The fabric combines patented repel and release technology that helps YES Essentials stay clean with nothing more than soap and water. Though it's easy to clean, YES Essentials' high durability enables it to uphold its high quality look and feel when exposed to traditional, maximum strength cleaning products often used in healthcare facilities. Its moisture barrier incorporates the water-proof quality of vinyl while maintaining the hand and visual appeal of textiles.

After years of research and innovation at Milliken & Company, YES Essentials was introduced to the automotive industry in 2007, gaining a loyal consumer base of American drivers who enjoy the benefits of no stains and no smells within their cars. YES Essentials fabrics will be incorporated into more than 2 million cars by the end of 2008. The concerns consumers have about stains and odor-causing bacteria in their cars are the same worries healthcare providers have about the fabrics they use within their facilities. Milliken & Company recognized these high-traffic areas need YES Essentials durable, attractive, and easy-to-clean fabrics that resist germs, allergens, moisture, stains, and odor-causing bacteria.

Milliken & Company's YES Essentials uses the most environmentally safe technologies available, making it a responsible, green product that supports sustainability from beginning to end. Milliken is a recognized leader in sustainable initiatives for consumer and commercial products, eco-sensitive manufacturing processes, and continuous reduction of its environmental footprint.
